JA Epic

Board (17 issues)

- PIQ-15 SQL database with 4 tables: customer, item, order and orderline.
- PIQ-2 As a user I would like to be able to view all customers in the system so that I can see everyone in the database.
- PIQ-3 As a user I would like to update a customers details so that changes can be made to their information at any time.
- PIQ-4 As a user I would like to delete customers in the system so that personal information can be deleted from the database when required.
- PIQ-6 As a user I would like to view all items in the system so that I can see what games I have for sale.
- PIQ-5 As a user I would like to add an item to the system so that it is available to be ordered.
- PIQ-9 As a user I would like to create an order for a customer so that they can purchase an item.
- PIQ-22 As a user I would like to add a new customer to the database so that they can make orders.
- PIQ-17 Junit testing (80%)
- PIQ-18 Ensure there is a fat jar which can be deployed from the command-line
- PIQ-11 As a user I would like to delete an order in the system so that completed orders are removed.
- PIQ-8 As a user I would like to delete items from the system so that games can no longer be purchased.
- PIQ-21 Create a presentation.
- PIQ-10 As a user I would like to view all orders in the system so that I can see what customers are buying.
- PIQ-20 An ERD and UML diagram in .png format.
- PIQ-16 Risk assessment pdf
- PIQ-19 A README.md explaining how to use and test the application.
